

Laptop Printing to Libraries' Printers

1

Start menu --> Run

In the text box, type the following:

\\printsrv3.itap.purdue.edu

Enter career account login/password when asked for authentication.

NOTE: onepurdue\ must precede your username (ex: onepurdue\username)

2

Select printer. Printers are named by building — not library. Use only those printers with “Lib” in the name.

In the Undergraduate Library, select one of the following:

hiksg950-Lib1
hiksg950-Lib2
hiksg950-Lib3
hiksg950-Lib4

(refer to map on back for locations)

Double-click the printer of choice. This will go through a connection to the printer and show the print queue window.

3

At this point, the printer is installed on the computer and will be in the selection of printers when a printout is requested.

The computer will keep the printer designation; but for future use, connect to the print server by repeating the first two steps *before* using the printer.
