A STAFF E-NEWSLETTER MARCH 28, 2018

P-DOG POP-UPS!

BY KATHRYN DILWORTH

As we close out the fiscal year, I look back on a very exciting year in fundraising for the Purdue Libraries. Once again, through our mission, we have connected with people in a way that convinces them we are the place for their philanthropic giving. Considering all the needs across the globe and opportunities to give, I am grateful that so many – many of whom are not alumni – choose to support what you all do and our valuable collections.

I feel sure I am the only one in Libraries who geeks out on philanthropy data, but I think it is important to share some trends that will ultimately impact all of us who work in institutions that benefit from philanthropic giving. This year's *Giving USA* report (prepared and published each year from scholars just down the road at the Lilly Family School of Philanthropy at IUPUI) states that giving increased over last year. The 2017 total was \$281.9B. However, the report also showed that growth had slowed and, more importantly, that growth in giving to support education had grown very little compared to previous years.

Thanks to the Baby Boomers, philanthropic giving has become a significant factor in our economy, but there are concerns about what will happen when future generations come into position to lead this effort. Gen Xers and Millennials are not expected to have the savings or investment earnings their parents worked so hard to grow. Times have changed, as we are all aware, and the nonprofit sector has challenges ahead.

At a time when information proliferates at extreme rates, we can't expect young people to figure out on their own how integral philanthropy is to institutions and services they value. Through volunteer opportunities and fundraising events, those who work in this area in higher education are beginning to develop models to foster philanthropic giving with students, with a long-term goal of developing the donors that we need to engage in the future. As part of this movement, the Libraries and Honors College are partnering this year on the Purdue Day of Giving in a series of pop-up events, which we hope will educate students about the impact that philanthropic giving has on their Purdue experience and begin to get them to see how even low-level participation can be meaningful.

On April 25, 2018, we will host one event each in the Wilmeth Active Learning Center, Hicks Undergraduate Library, and Honors College. Student Ambassadors from the Honors College will distribute information about the event and the way that philanthropic funds support the university. Students will also have an opportunity to make a donation. We will also have fun giveaways and activities. These are truly pop-up events – quick and dirty – and driven predominantly by our social media platforms.

We hope you will join in the fun and engage virtually. The students of today will (hopefully) be supporting the Libraries' mission of tomorrow!

STRATEGIC GOAL ICONS

You will notice the use of these icons before the article that are symbolic of our Libraries strategic goals.

SCHOLARLY COMMUNICATION: We enhance the spectrum of scholarly communication from discovery to delivery through the provision of information resources, services, research, partnerships, and national and international leadership. We advocate the change in scholarly communication to promote economic sustainability, effective use of copyright, and open access to knowledge for all.

ENGAGEMENT AND EMERGING OPPORTUNITIES: We commit our resources and expertise in Library, Information, and Archival Sciences to advance the profession and contribute to the welfare and economic development of the citizens and state of Indiana, the nation, and the world.

LEARNING: We contribute to student success and lifelong learning through innovative educational practices. Our research-based information literacy programming empowers Purdue's diverse communities of learners to use information critically to learn and to create new knowledge. Our learning spaces, both virtual and physical, align with evolving curricula and student learning needs.

INFRASTRUCTURE: Libraries staff working together to enhance the users experience, raise awareness of Purdue Libraries and recognize the continued learning and successes of our staff.
