

JTRP Report Publishing Process

Modern publishing practices require a diverse skill set that often is best outsourced to specialized organizations to produce and effectively disseminate high quality, professional documents. JTRP embraces this concept as the most cost-effective mechanism for managing report production from the submission of a draft to a published report.

An integral component of implementing this process is to engage a production editor. Production editors at professional publishers manage the publishing workflow, incorporate feedback at agreed points, and engage with stakeholders in the case of exceptions to the normal workflow. [Figure 1](#) illustrates the conceptual workflow that Purdue University Press and JTRP have defined for JTRP report production. [Figure 2](#) displays an overview of the production schedule that each report will follow.

For additional information regarding the report production process, contact JTRP’s production editor, Kelley Kimm, at kkimm@purdue.edu or (765) 494-8024.

Figure 2: JTRP Production Schedule Overview

Report Production Workflow

1. The Principal Investigator (PI) submits the Draft Final Report to e-Pubs in Word format. (To view screenshots of this process, see [Exhibits 1 through 6](#).)
 - a. To submit a draft, go to JTRP's page on e-Pubs: <http://docs.lib.purdue.edu/jtrp/>.
 - i. On the left, there is a link called [Submit Research](#). (If you do not already have an e-Pubs account, you will need to create one to login.)
 - ii. Check the box to "Agree to terms," then click "Continue"
 - iii. Enter your title, authors, and all other information about your report in the fields provided, and upload your report. Click "Submit"
 - iv. Your technical summary text, Form 1700, Implementation Plan form, appendices, or any other content not part of the body of the report should be submitted using the "Supplemental content" tab after you have uploaded your report.
 - b. The Draft Final Report Submission needs to include the following documents in order to proceed to the review stage:
 - i. Draft Final Report
 - ii. Technical Summary text
 - iii. Implementation Plan form
 - iv. Form 1700
2. The Production Editor verifies that all necessary materials have been submitted and compiles the Form 1700, Technical Summary text, and Draft Final Report into a pdf, which is then distributed, via the e-Pubs system, to the Study Advisory Committee (SAC) for review.
 - a. The SAC members will each receive an email (see [Exhibit 7](#)) requesting that they review the Draft Final Report. They will be asked to follow a link to e-Pubs and to either "confirm" or "decline" the review request (see [Exhibit 8](#)).
 - b. After confirming the request, the SAC member will receive another email with instructions for completing the review (see [Exhibit 9](#)). This email will include a link to download a blank review form (see [Exhibit 10](#)).
 - c. After completing the review, the SAC member will upload their review form to e-Pubs. For screenshots detailing the review process on e-Pubs, see [Exhibits 11 through 14](#).
 - d. The Production Editor will also send an email to the following people to alert them that the review is underway: JTRP Managing Director, JTRP Operations Assistant, JTRP Research Program Director, and INDOT Senior Systems Analyst.
3. The SAC has 4 weeks to review Draft Final Report. System-generated reminders are sent to SAC members who have not yet responded to the request or submitted a review (see Exhibits [15a](#) and [15b](#)).
4. At the 4-week deadline, as long as both the Project Administrator (PA) and Business Owner (BO) have submitted reviews, the Production Editor compiles the reviews and sends them to the PI for revisions (see [Exhibit 16](#)).
 - a. If the PA and BO have not both submitted reviews, the Production Editor will contact PA and develop plan to resolve.
 - b. When the review period is closed, the PI will receive an email with the reviews attached (or an update on the revised production schedule). This email will state a due date that is 3 weeks from the date sent.

- e. Production Editor creates PR version of Technical Summary and sends to JTRP Director (Darcy Bullock) and JTRP Managing Director (Debbie Horton) for approval.
 - f. Production Editor creates title and acknowledgments pages.
 - g. Typeset report and Technical Summary are sent to authors for review.
 - i. Production Editor will send files via email or Dropbox.
 - ii. Authors have one week to review the document for errors that may have occurred during typesetting and to respond to queries. Significant content changes are not acceptable at this stage.
 - iii. Any necessary changes should be submitted to Production Editor.
 - h. Production Editor sends corrections to vendor partner. Upon receipt of corrected pdf, the Production Editor checks that corrections were implemented and requests final deliverables from vendor partner.
 - i. Final document is produced.
 - i. Production Editor assembles Final Report consisting of Title Page, Acknowledgement Page, Form 1700, Executive Summary, Body of Report, and Appendices, if applicable.
 - ii. Production Editor uploads Final Report and Technical Summary (and Appendices, if not included in body of report) and again checks all of the report's metadata in e-Pubs for accuracy.
9. The report is published.
- a. Once the report is live on ePubs (it can take several hours for the site to update), the Production Editor receives notification and sends an email to the authors ([see Exhibit 17](#)) and cc's the PA, the JTRP Administrative Assistant (Bridget Brunton), the JTRP Director (Darcy Bullock), the JTRP Managing Director (Debbie Horton), the INDOT Deputy Commissioner of Engineering Services & Design Support (Jay Wasson), the INDOT JTRP Research Program Director (Barry Partridge), and the INDOT Senior Systems Analyst (Karen Zhu).
 - b. The JTRP Administrative Assistant then sends the link of the published report and a Qualtrics survey to the BO and SAC members.
 - c. The Production Editor registers the DOI through CrossRef and ensures that it is operational. (It can take an hour or more for CrossRef to process the DOI.)

10. Report is distributed to the following libraries and offices in accordance with SP&R reporting requirements:

- **Federal Highway Administration Research Librarian**
FHWA Research Library
6300 Georgetown Pike
McLean, VA 22101-2296
fhwalibrary@dot.gov
- **Office of Corporate Research, Technology, and Innovation Management,**
Federal Highway Administration, HRTM-10
Turner-Fairbank Highway Research Center, Room T-305
6300 Georgetown Pike
McLean, Virginia 22101

Exhibits

The screenshot shows the Purdue University e-Pubs website. At the top left is the Purdue University logo. To its right, the text "e-Pubs" is displayed in a large, white, sans-serif font against a dark background. Below the logo and title, there are navigation links: "Home", "About", "FAQ", and "My Account".

On the left side of the page, there is a search section with the text "Enter search terms:" followed by a search input field and a "Search" button. Below this is a dropdown menu labeled "in this series". Further down, there are sections for "Advanced Search", "Notify me via email or RSS", "Links for Authors", "Policies and Help Documentation", "Links" (listing Purdue Libraries, Purdue University Press Journals, and Joint Transportation Research Program), and "Browse" (listing Collections and Authors). At the bottom left is the "DIDDIE" logo.

The main content area is divided into two columns. The left column is titled "Login" and contains the following fields and options: "Email address:" with a text input field containing "epubstemp@gmail.com"; "Password:" with a text input field containing "****"; a "Remember me" checkbox; and a "Login" button. Below these fields is a link for "Forgot your password?". A note below the login fields reads: "New Email Address? Please log in and choose **Edit Profile** on your **My Account** page to update your contact information or customize your password."

The right column is titled "Create new account" and contains the text: "You will need to create an account to complete your request. It's fast and free." Below this text is a "Sign up" button.

Exhibit 1: e-Pubs login page.

The screenshot shows a page titled "Joint Transportation Research Program" with a subtitle "Draft Final Report Upload Instructions". The main heading is "Joint Transportation Research Program" in a large, bold, black font. Below it is the subtitle "Draft Final Report Upload Instructions" in a slightly smaller, bold, black font.

The page contains the following text: "Follow the instructions below to upload your draft final report to the Joint Transportation Research Program."

Before you begin, please be sure you have the following information at hand:

- The project title
- The full names and institutional affiliations of the authors
- An abstract of about 250 words
- A list of descriptive keywords
- The project SPR number
- The draft final report in an editable file format (e.g., Microsoft Word)
- A Technical Summary ([Word template available here](#))

The upload process consists of the following steps:

1. Read and accept the Purdue Libraries license agreement below
2. Enter information collected in the steps above
3. Upload your draft final report, technical summary, and any supplementary documentation

The following agreement applies to the published report as it will appear publicly, following the Study Advisory Committee (SAC) review

Exhibit 2: Instructions and License Agreement page for uploading Draft Final Report.

REQUIRED Title

Use headline-style capitalization (e.g., *Stiffness of Hot-Mix Asphalt*)

Enter title:

REQUIRED Authors

1. Use the green "plus" button to add co-authors.
2. Order the authors by using the number field to the left of the author names.

Search For An Author Using: Last Name, First Name, or Institution

1 Temporary Account  

Abstract

Enter your report abstract here.

<p>Please click the Continue button once after you've attached your supplemental files. <input type="button" value="Continue"/></p>				

Exhibit 6: Additional files. Upload the additional files as Supplemental Files. The screen will look like this.

Dear Tommy E Nantung,

A new Joint Transportation Research Program (JTRP) draft SPR-3200 report entitled "Durability of Saw-Cut Joints in Plain Cement Concrete Pavements" has been submitted by Javier Castro, Wenting Li, Mohammad Pour-Ghaz, Mike Golias, Bernie Tao, Hongfang Sun, and W. Jason Weiss.

Our Records indicate you are a member of the Study Advisory Committee (SAC) and I am writing to ask you complete a review of this technical report by June 23, 2011.

Please confirm or decline this review request by clicking the following link:

http://docs.lib.purdue.edu/cgi/preview.cgi?.authP=article%2Ccontext%2Creview_request%2Clogin&review_request=yes&context=jtrp&article=2589&.authT=%2FHbqXQJpmaaP%2BVZbswC4BkOi1QMCPQ&login=1491326

After confirming, you will receive a separate email with detailed instructions for completing the review.

For your reference, the current JTRP technical report collection is available at <http://docs.lib.purdue.edu/jtrp>.

If you have any trouble accessing the report draft, please contact Kelley Kimm at kkimm@purdue.edu or (765) 494-8024.

Please confirm receipt of this request in 7 days.

<text of report abstract>

Exhibit 7: Request to Review email. This is sent to SAC members (including the PA and the BO) to initiate the 4-week review period. SAC members use the links in this email to confirm or deny that they will review a report.

I will review it I will not review it

Abstract:

The objective of this project was to evaluate factors influencing the durability of the joints in portland cement concrete pavement in the state of Indiana. Specifically this work evaluated the absorption of water, the absorption of deicing solutions, the relationship between the degree of saturation and concrete deterioration, and the role of Soy Methyl Esters as a potential concrete sealer. The aforementioned items were studied in conjunction with the observation of premature joint deterioration in concrete pavements. Previous work by the PI identified that deteriorating joints were observed to frequently have standing water and damaged joint sealant. To better understand the potential mechanisms responsible for joint deterioration, a series of mortars were tested that are consistent with the mortar fraction of concrete paving mixtures. The first portion of the work examined the role of deicing salt solutions on the wetting and drying behavior of concrete elements (this was a joint series of experiments with SPR 3093). It was observed that salts altered the equilibrium relative humidity of the solution, as such concrete containing deicing solutions dried less frequently than concrete containing only pure solution. Further, it was observed that the rate of water absorption was related to the square root of ratio of surface tension and viscosity. Salt solutions have a slower rate of absorption than plain water. It was also observed that concrete previously exposed to deicing salts also exhibited an altered rate of water absorption. The second portion of the work examined the concept of the degree of saturation and its relationship with freeze-thaw damage. Specifically mortars with different air contents were examined. Fagerlund developed a model that proposed a critical degree of saturation could be correlated with the onset of freeze-thaw damage. The work suggests that absorption testing should be used to determine the degree of saturation which can be used to estimate the time to reach a critical degree of saturation. Once this critical degree of saturation was reached freeze-thaw damage was inevitable. While entrained air was observed to slow the time to reach a critical degree of saturation, this critical degree of saturation could not be avoided. The final portion of the work examined the potential use of penetrating concrete sealers (like soy methyl esters) to reduce water absorption and the corresponding freeze-thaw damage. While absorption testing was able to show the benefits of sealers, differences were observed regarding the influence of sealer composition on freeze-thaw damage.

Exhibit 8: Reviewers confirm that they will review the report or decline to review the report.

Dear Tommy Nantung,

Thank you very much for agreeing to review the draft SPR-3200 report entitled "Durability of Saw-Cut Joints in Plain Cement Concrete Pavements" by Javier Castro, Wenting Li, Mohammad Pour-Ghaz, Mike Golias, Bernie Tao, Hongfang Sun, and W. Jason Weiss.

Please take the following steps to prepare your review:

1. Download a blank review form:

http://www.lib.purdue.edu/escholar/epubs/jtrp_form.pdf.

2. Download the draft report at the following address (if you have not already done so)

<http://docs.lib.purdue.edu/cgi/preview.cgi?article=2589&context=jtrp&login=1509505>

3. Complete the blank review form and save it to your computer.

In addition to the ratings requested on the review form, you are strongly encouraged to provide detailed comments in the spaces provided on the review form, in a separate document, or directly onto a copy of the draft report itself.

4. Upload the completed review form (required) and any separate files with your comments (optional) at the following address:

<http://docs.lib.purdue.edu/cgi/preview.cgi?article=2589&context=jtrp&login=1509505>

Should you encounter any difficulties in this process, please contact Kelley Kimm at kkimm@purdue.edu or (765) 494-8024.

The Joint Transportation Research Program thanks you for your review of this report.

Exhibit 9: Reviewer Instructions email: This is sent to SAC members upon confirming that they will review a report. This email will contain instructions and links required for the review process.

Joint Transportation Research Program
Draft Final Report Review Form

Project SPR Number: _____

<p>b. How would you rate the report in terms of understanding of the intended user?</p>	<p>Score Select Rating</p> <p>Comments</p>

1 of 3

<p>c. How would you rate the report in terms of supporting the project findings and conclusions?</p>	<p>Score Select Rating</p> <p>Comments</p>
<p>d. The Technical Summary should contain a short introduction of the study's background; a concise summary of the research results; and the highlights of proposed implementation. How would you rate the Technical Summary?</p>	<p>Score Select Rating</p> <p>Comments</p>
<p>e. Do you accept the Final Report?</p>	<p>Decision Register Decision</p> <p>Comments</p>

2 of 3

If the draft report is not acceptable in its present form or if it is acceptable but could be improved, you would help the author and JTRP very much by suggesting revisions, both general and specific. We realize there is not room on this form for extensive evaluation. Please prepare separate sheets containing deeper analysis if you are so inclined. Some of our most helpful comments have come from the extra evaluation included by thoughtful and insightful readers. You may also provide your detailed comments on the draft report in the space below or provide a digitally "marked-up" copy of the report when prompted at the review submission site.

Additional Comments

When you have completed your review, please save this PDF with your changes and then submit the PDF file by following the link you received by e-mail after agreeing to review the report.
 JTRP thanks you sincerely for taking the time to provide this important review.

Dear Tommy Nantung:

This is an automatically-generated note to remind you that we recently asked you to review the draft SPR-3200 report entitled "Durability of Saw-Cut Joints in Plain Cement Concrete Pavements" by Javier Castro, Wenting Li, Mohammad Pour-Ghaz, Mike Golias, Bernie Tao, Hongfang Sun, and W. Jason Weiss.

Please confirm receipt of the review request for this report by going to the following link:

<http://docs.lib.purdue.edu/cgi/preview.cgi?article=1849&context=jtrp&login=1442890>.

Once you click on the above link, details for downloading the draft report and procedures for submitting your review will be emailed to you.

Exhibit 15a: Reminder to confirm or deny review request. If a SAC member has not responded to the initial Request to Review email after 7 days, they will receive this reminder.

Dear Tommy Nantung:

Thank you for agreeing to review the draft SPR-3200 report entitled "Durability of Saw-Cut Joints in Plain Cement Concrete Pavements" for Joint Transportation Research Program. This is just a gentle reminder that this review is due in 1 day/ was due ___ days ago.

Please send an email to kkimm@purdue.edu or give Kelley Kimm a call at (765) 494-8024 indicating when you expect to complete the review.

You may submit your report by visiting the URL below.

Thank you very much for your hard work as a reviewer. We appreciate your efforts.

<URL>

Exhibit 15b: Reminder to review report. If a SAC member has agreed to review a report, but has not yet submitted a completed review form, they will receive a reminder after 7 days. Additional reminders will go out 3 days prior to the due date, and 1 day before the due date.

Dear Javier Castro, Wenting Li, Mohammad Pour-Ghaz, Mike Golias, Bernie Tao, Hongfang Sun, and W. Jason Weiss:

Your draft final report "Durability of Saw-Cut Joints in Plain Cement Concrete Pavements" (SPR-3200) has been reviewed for publication in the Joint Transportation Research Program technical report series (insert url to JTRP collection).

The reviewer comments are attached. Please contact me at kkimm@purdue.edu or (765) 494-8024 if you encounter any difficulties in viewing your reviewer comments.

To keep the editorial process on schedule, we would like to receive the following documents by_____.

- Revised technical report
- Revised technical summary
- Implementation report with necessary signatures.

If you do not think you can meet this deadline, please send an email to the PA and me stating when you will be able to complete this submission.

Reviewer comments and a preview of the report's title page may be viewed here:

<http://docs.lib.purdue.edu/cgi/preview.cgi?article=1838&context=jtrp>

To view the Draft Final Report Review Forms submitted by your reviewers, click here:

<http://docs.lib.purdue.edu/cgi/preview.cgi?article=1838&context=jtrp&window=viewdecision&decision=0>

Exhibit 16: Review completed. At the end of the review process, the Production Editor will compile the review forms, and the PI will receive this email with the attached reviews.

Dear Javier Castro, Wenting Li, Mohammad Pour-Ghaz, Mike Golias, Bernie Tao, Hongfang Sun, and W. Jason Weiss:

Congratulations! Your final report "Durability of Saw-Cut Joints in Plain Cement Concrete Pavements" (SPR-3200) has been published in the Joint Transportation Research Program series.

A recommended citation for this technical report is shown below

J. Castro, W. Li, M. Pour Ghaz, M. Golias, B. Tao, H. Sun, & W. J. Weiss, "Durability of Saw-Cut Joints in Plain Cement Concrete Pavements," Joint Transportation Research Report SPR-3200, June 2011; DOI: _____.
